

2mg 10mg Gonadorelin Peptide Vials CAS 33515-09-2 For Anti Cancer

Our Product Introduction

for more products please visit us on bodybuild-supplement.com

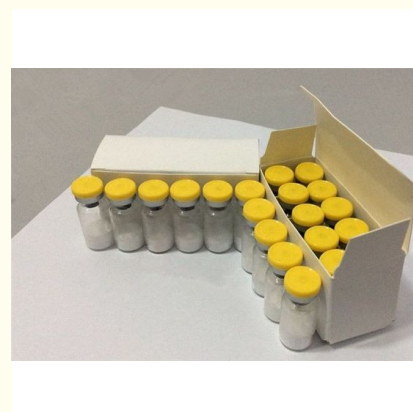

Basic Information

- Place of Origin: China
- Minimum Order Quantity: 10vials
- Price: USD
- Packaging Details: 1kg/Foil Bag
- Delivery Time: 3-7days after received payment
- Payment Terms: T/T, Western Union, PayPal
- Supply Ability: 5000KG Per Year

Product Specification

- Product Name: Gonadorelin
- Purity: 99%
- Cas: 33515-09-2
- Specification: 2mg 10mg
- Usage: Anti Cancer
- Highlight: 2mg Peptide Vials, Gonadorelin Peptide Vials

Product Description

High Quality 2mg 10mg Peptide Vials Gonadorelin For Anti Cancer

Basic Information Form of Gonadorelin

Product Name	Gonadorelin
CAS NO.	33515-09-2
Density	1.54
Molecular Weight	1182.3
Molecular Formula	C55H75N17O13
Aspect	White Powder
Product Purity	99%
Stability	2 years

Brief Introduction of Gonadorelin

1. Gonadorelin is a drug that is similar with gonadotropin-releasing hormone (GnRH) that is naturally relived from the hypothalamus gland. Gonadorelin makes the pituitary gland to produce other hormones (luteinizing hormone [LH] and follicle-stimulating hormone [FSH]). LH and FSH modify development in children and fertility in adults.

2. Gonadorelin is applied to test how well the hypothalamus and the pituitary glands are working. Gonadorelin is also utilized to cause ovulation (release of an egg from the ovary) in women who do not have regular ovulation and menstrual periods because the hypothalamus gland does not release enough GnRH.

Gonadorelin is another name for gonadotropin-releasing hormone (GnRH). It is a synthetic decapeptide prepared using solid phase peptide synthesis. GnRH is responsible for the release of follicle stimulating hormone and leutinizing hormone from the anterior pituitary.

GnRH is available as gonadorelin hydrochloride)and gonadorelin diacetate tetrahydrate for injectable use. Studies have described it being used via an infusion pump system to induce ovulation in patients with hypothalamic hypogonadism. It is also used in veterinary medicine as a treatment for cattle with cystic ovarian disease.

Gonadorelin is responsible for the release of follicle stimulating hormone and leutinizing hormone from the anterior pituitary. In the pituitary GnRH stimulates synthesis and release of FSH and LH, a process that is controlled by the frequency and amplitude of GnRH pulses, as well as the feedback of androgens and estrogens.

Application and Function of Gonadorelin For Sale

Treatment for hypothalamic amenorrhea, hypogonadotropic hypogonadism, delayed puberty, cryptorchidism, infertility and impotence

Pulsatile GnRH treatment can fix Hypothalamic–pituitary–gonadal axis problems and restarts Testo natural production

Support muscle growth & maintenance through stimulation of testo production

Positive effects for spinal cord injury recovery

Neuroprotective effects

Possible Side-effects Of Gonadorelin For Sale

Overdose or misuse of Gonadorelin leads to a decrease in LH and FSH levels and hypogonadism

Hot flashes (a sudden wave of mild or intense body heat), sweating

Injection site irritation (pain, swelling, or itching)

Headache, nausea or dizziness

Skin rashes

Flushing

Package and Shipping of Gonadorelin For Sale

Package: 5mg/vial, 10vials/box

Shipping: With 3-5 days after your payment
